

ADITYA KUMAR

AI Engineer

adityakumar29f70@gmail.com • LinkedIn <https://www.linkedin.com/in/aditya-kumar-9a47b9310/> GitHub: <https://github.com/aditya29f70>

• Patna Bihar

Summary

Aspiring AI Engineer passionate about machine learning, deep learning, and generative AI, with experience developing AI-powered solutions using Python and data analytics tools. Skilled in building intelligent applications and solving real-world business problems.

Experience

Open Source Contributor – GirlScript Summer of Code 2025 (GSSoC'25)

Remote, India

Open Source Contributor

07/2025 - 08/2025

Database & UI Developer – AI-Powered Wardha Metro Simulation ; Git-Hub -> <https://github.com/aditya29f70/WardhaMetroFlow>

- **Designed and optimized the database schema** (e.g., using SQLite) to store metro station data, route information, and passenger flow efficiently, improving data structure and scalability.
- **Developed an intuitive About Station UI** within the Passenger/Admin interface (built using Js, HTML/CSS), enhancing the user experience by clearly displaying station details and visuals
- **Ensured modular and clean code** in both the About page and database integration, maintaining consistency with the project's architecture and documentation standards.

Smart India Hackathon 2025

Remote, India

AI Based dropout prediction and counseling system Team Name- AnveshanX

09/2025 - 08/2025

Niriksha Dashboard ; Info -> <https://www.linkedin.com/feed/update/urn:li:activity:7378369961892732928/>

- A unified web platform designed for merging attendance, grades, fees & attempts from fragmented Excel sheets into one risk profile.
- Integrates rule-based thresholds with ML predictions delivering 90%+ accuracy.
- Escalates risk levels from Yellow to Red, ensuring timely notifications reach mentors & parents.
- Flags students 4-6 weeks earlier than term-end failures, enabling early counselling interventions.

Education

Indian Institute of Technology Madras

04/2024 - 04/2027

BS, DATA SCIENCE , CGPA 8.69

Certification

Scientific Computing with Python ; <https://www.linkedin.com/in/aditya-kumar-9a47b9310/details/certifications/>

Feb 2025

Skills

Languages: PYTHON • PostgreSQL ;; Ai-Infrastructure: LangChain/LangGraph • Flask • SQLAlchemy • Fast-MCP ;; Bi-Tool: Power-Bi • Excel

Libraries: Pandas • Scipy • NumPy • Scikit-Learn • Matplotlib • TensorFlow • NLP • Pre-processing • TF-IDF • Text-classification

Projects

AI-Powered Chrome Extension for Web & YouTube Content Understanding (RAG)

Collage

<https://github.com/aditya29f70/Chrome-plugin-in>

12/2025

AI-Powered Chrome Extension for Web & YouTube Content Understanding (RAG)

- Built an AI-powered Chrome extension using LangChain and RAG to enable contextual Q&A and summarization for web pages and YouTube videos with open-source LLMs.

Detect multiple thoracic pathologies from chest X-ray images.

IITM college competition

<https://www.kaggle.com/code/aditya24f2002970/24f2002970-notebook-26t1>

02/2026

Developed a deep learning-based multi-label classification system to detect **20 thoracic pathologies** from chest X-ray images

- Designed and fine-tuned a deep learning pipeline for automated thoracic disease detection from chest radiographs, trained on **51K+ labeled X-ray images** across **20 pathology classes**. Implemented transfer learning and imbalance-handling techniques to improve recall for rare diseases under a medical evaluation framework prioritizing false-negative reduction.
